PROFESSIONAL SUMMARY

Passionate software developer with two years of experience, I have built a diverse project that includes work in C#, Java, Android and Ruby.

Graduated with **Distinction** from **National University of Singapore**, achieving a GPA of **4.66**.

As part of program, I completed a five-month internship at **Department of Civil & Environmental Engineering**, where I functioned as a **full-stack developer**. This experience honed my skills in both front-end and back-end development of new technology stacks.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Internship) , NUS DCEE

Sept, 2023 – Jan, 2024

- Engineered a full-stack web application utilizing Nextjs, Node.js and AWS Amplify and GraphQL as backend, MongoDB with AppSync to store complicated data.
- Constructed GraphQL endpoint with Node.js resolvers, seamlessly integrating MongoDB, AWS S3 as data sources through AWS AppSync.
- Leveraged Typescript-based UI components, seamless and efficient frontend development, and constructed 3D visualization of BIM model.
- Executed with new library of 3D visualization of BIM model.

Junior Software Developer , GICM

Feb, 2021 – Dec, 2022

- Engineered a Ruby-On-Rails web application, integrating ReactJs frontend with PostgreSQL database.
- Implemented a custom SEO engine similar to Google search for the client application.
- Devised Ruby backend functionalities including exporting excel and word files, importing excel files, scheduling job to send emails to end users.
- Documented test-cases for every feature ensuring robust testing.
- Acquired proficiency in new technology stacks, including Ruby and Ruby on rails.
- Achieved 100% success in enabling users to access new features seamlessly.

Software Developer (Internship) , GICM

Aug, 2020 – Dec, 2020

- Participated in the development of a web application which is Pharmacy ECommerce system using Java Spring Framework and Thymeleaf, following SDLC process.
- Analyzed requirement documentation and prepared detailed flowchart diagrams.
- Developed and implemented key system features and conducted comprehensive testing of all features.
- Created thorough testing documentation to ensure quality and reliability.
- Successfully delivered the completed system on time and met all client requirements.

TECHNICAL SKILLS

Technologies:

- JavaScript, TypeScript, NextJS, ReactJS
- Java, Spring Boot, REST API
- C#, ASP.NET Framework
- Ruby, Ruby on Rails
- MySQL, MongoDB, DynamoDB, PostgreSQL, GraphQL
- Git
- Tailwind CSS, Antd Design
- AWS
- Three.js, BIM model
- Python, Numpy, Pandas
- Android Native, Kotlin
- Unit Testing

Tools:

- Jira, Confluence for SDLC

SOFT SKILLS

- Independent and driven person
 - Valuable team member who offers support
 - Able to handle pressure effectively
 - Thorough and proactive in completing tasks
 - Quick to understand new technologies
 - Skilled in problem-solving methods
-

EDUCATION

Institute of System Science (National University of Singapore)

- Graduate Diploma in System Analysis Feb, 2023 – Feb, 2024

University of Information Technology Yangon

- Bachelor of Computer Science (Software Engineering) Dec, 2015 – Dec, 2020
-

CERTIFICATIONS

- Certificate Japanese-Language Proficiency (N3)
 - React Basic (Meta)
 - Advanced React (Meta)
 - React Native (Meta)
 - Building a REST API with Spring Boot (Spring Academy)
 - Securing a REST API with OAuth 2.0 (Spring Academy)
 - Certificate of Participation at UIT Open Campus
-

PROJECT EXPERIENCE

Project 1 : School Enrollment System

- Developed a web application system for managing students, teachers, and courses, using Java Spring Framework and MySQL.
- Collaborated with other team members to execute whole system and adjusted screen designs for other roles.
- Played a key role in developing web application system with distinct roles.
- Performed frontend using Thymeleaf and conducted unit testing for every function.

Project 2 : Dream Space Rental System

- Led a team of 5 members in developing a web application using Java Spring Framework, Thymeleaf, and MySQL for house renting.
- Designed admin and user interfaces with features for user management, house rental oversight, and search functionalities.
- Enabled users to search for available houses and initiate bookings for admin approval.
- Integrated secure authentication and automated email alerts.
- Conducted thorough testing to ensure application reliability.
- Achieved 100% successful delivery of the project deadline.

Project 3 : WBGT_(Web Bulb Globe Temperature)

- Collaborated with team members to deliver the entire project, integrating backend and frontend components.
- Developed a backend system using Python to display WBGT data, train on historical data, and predict future values.
- Implemented the web application with React.js and Java, providing a seamless user experience.
- Played a key role in developing the Android application, fetching backend data using Retrofit and displaying current and predicted WBGT data based on user location.
- Enabled users to search and view WBGT data for different geographical locations.

Project 4 : Shopping Cart WebApp System

- Spearheaded the development of a web application for book purchases utilizing C# ASP.NET and MSSQL.
- Utilized C# Razor for front-end implementation.
- Incorporated JavaScript functionalities to facilitate the management of shopping cart quantity and ratings.
- Enabled users to conduct specific book searches.
- Played a pivotal role in the development of the web application.

LANGUAGES

- English (Advanced)
- Japanese (N3)
